- Viennese National Bank Grant – 1998: study evaluating early postoperative feeding and outcome in ICU patients after major intracranial bleeding; 130.000,- ÖS
- Novartis Research Grant – 1999: study to investigate immunological changes and outcome in colorectal cancer patients perioperatively fed with an immunenancing diet; 330.000 ÖS
- Viennese Major Council Research Grant – 2003: liver metastases after colorectal cancer; influence of specific genetic alterations on prognosis and response to chemotherapy; 17.000,- €
- Viennese Major Council Research Grant – 2008: influence of Bevacizumab upon systemic angiogenesis capacity; 30.000,- €
- Austrian National Bank Research Grant – 2012: response prediction to chemotherapy in mCRC; 108.000,-€

### **COMPETITIVE RESEARCH GRANTS THROUGH PARTICIPATION IN INTERNATIONAL STUDIES:**

- Metastatic Colorectal Cancer: app. 240.000,- €
- Hepatocellular Cancer: app 200.000,- €

### **STUDY PARTICIPATION (PHASE II-III):**

- EORTC 40983: periOP CTx vs Surgery alone in resectable colorectal cancer liver metastases; Phase III; 2002-05 (ref: Lancet 2008, Annals Surgery 2012, Lancet Oncology 2013)
- CELIM 1: Folfex/Folfiri plus Cetuximab in initially unresectable colorectal cancer liver metastases; Phase II; 2004-08 (ref: Lancet Oncology 2010, Annals Oncology 2014)

- ASSO-LM1: Pre- and postOP chemotherapy including Bevacizumab in potentially curable mCRC; phase I/II; 2006-08 (*ref: JCO 2008*)
- OLIVIA: Folfox6/FOLFOXIRI plus Bevacizumab in unresectable colorectal cancer liver metastases; Phase II; 2008-11 (*ref: Ann Oncology 2014*)
- STORM: Sorafinib vs Placebo in potentially curative treated HCC; Phase III; 2007-10 (*ref: ASCO Proceedings 2014*)
- BMS CA209-9DX: Nivolumab vs Placebo after curative resection or ablation of high risk HCC; Phase III; 2018 - 20 (*currently FU*)
- DRAGON 1/2: Portal vein and hepatic vein occlusion to induce rapid hypertrophy of the future liver remnant; Phase II-III; *2021-ongoing*
- ACTICCA: Adjuvant therapy with GemCis vs Capecitabine after curative intent resection of CCC; phase III; *2014-ongoing*
- IMBRAVE 251: Open-label, randomized study of Atezolizumab with Levantinib or Sorafinib vs Levantinib or Sorafinib alone in HCC previously treated with Atezolizumab and Bevacizumab; phase III; *2020-ongoing*
- GAIN: neoadj chemotherapy with GemCis followed by liver resection vs immediate LR alone with or without adjuvant CTx in BTC; phase III; *2021-ongoing*
- MORPHEUS: a phase Ib/II, open-label, multicenter, randomized platform study evaluating the efficacy and safety of neoadjuvant immunotherapy in patients with surgically resectable hepatocellular carcinoma (Morpheus-NEO HCC); *2024-ongoing*
